

# KATY SOLOVEWICZ

SOFTWARE ENGINEER

**Dear Mr. Buckerzerg,**

I'm excited to apply for the Junior Full Stack Web Developer position at BookFace Inc. I attended a meetup you recently hosted where I met the company CTO and was moved by her mission of online community building. As a former leader in community-centered organizations, I want to contribute to software services that are dedicated to connect people to one another.

As the former leader of multiple non-profit organizations, I first started understanding the importance community-centric software when I collaborated with one of my teams to implement a CRM to track member attendance and donations. I loved using beautifully-designed software and wanted to develop the skills to create smart tools for users to connect with each other. Since then, I've studied HTML, CSS, Javascript, and React to develop my front-end development skills, and Python, C#.NET, and relational databases (MySQL, SQLite, PostgreSQL).

I'd love to join your team because while I'm independent and driven enough to have learned so much on my own, I am eager to learn more alongside a smart team of experienced developers to improve communication for online communities.

Thank you for taking the time to look over my resume. I look forward to hearing from you.

**Cheers,**

**Katy Solovewicz**
